

EXTREME MEDICINE MSC

PROGRAMME OVERVIEW

Through our unique partnership teaching arrangement, we offer an intensive program of study in extreme medicine.

The programme includes rigorous academic assignments combined with immersive residentials in authentic outdoor and wilderness settings. Students can gain hands-on experience in environments such as the desert, jungle, mountains, and polar regions. In addition, students can undertake a specialism in cold environments, hot environments, or humanitarian relief.

You will learn the practical skills, knowledge and understanding needed to perform at the highest possible level in the field of extreme medicine.

UNIVERSITY OF
EXETER
